FANGPING LAN

Affiliation: Temple University, PA; Email: fangping.lan@temple.edu;
LinkedIn: https://www.linkedin.com/in/fangping-lan-608433196/

Education

- PhD of Computer Science & Information

School: Temple University   **GPA:** -

Major: Computer Science & Information   **Expected Graduate:** May 2026

- Master of Software Engineering

School: Monmouth University   **GPA:** 4.00

Major: Software Engineering   **Graduate:** December 2020

- Bachelor of Computer Science and Technology

School: Changshu Institute of Technology   **GPA:** 3.79

Major: Computer Science and Technology   **Graduate:** June 2019

Project experience

- **LLM is A Database Tuning Expert**   Sept. 2024 – now

Project description: Our hypothesis is that LLMs have good capability to tune database since they studied DB tuning expert's experience stored in text, e.g., manuals, blogs, forums, and LLMs can be an agent to interact with DB to optimize configurations. Thus, LLM is a database tuning expert.

Skills: Python, GPT-4, Llama2, PostgreSQL, MySQL, Benchbase

- **One Document, Many Revisions, Too Many Edit Intention Taxonomies**   Sept. 2023 – Dec. 2024

Project description: We studied existing work to explore the intention behind the edits from the original and revised text. We integrated all proposed edit intention taxonomies into a comprehensive edit intention taxonomy that spans multiple application domains and analytical aspects.

GitHub: https://github.com/lanfangping/UniT-EditIntentionTaxonomy

- **Pyotr: Tableau as a network representation for deep analysis**   Jan. 2021 – July 2023

Technique: Python, SQL, PostgreSQL

Affiliation: Temple University, PA; Email: fangping.lan@temple.edu;
LinkedIn: https://www.linkedin.com/in/fangping-lan-608433196/

- **Fauré: A partial approach to network analysis**　　　　　September 2021 – Dec. 2021

Project description: Fauré, a preliminary design in which a datalog extension (called fauré-log) for incomplete information is developed to enable loss-less modeling, and combined with static analysis of pure datalog to implement example relative-complete verifiers.

Technique: Python, SQL, PostgreSQL

- **Sarasate: A strong representation system for network policies**　　　June 2021 – Sept. 2021

Project description: we adopt conditional tables and the usual SQL interface (a relational structured developed for incomplete database) as a means to represent and query sets of network states in exactly the same way as a single definite network snapshot.

Technique: Python, SQL, PostgreSQL

- **Hand Gesture Recognition**　　　　　　　　　　　　　　Sept. 2019 – Dec. 2020

Project description: It could recognize the dynamic hand gesture base on a webcam. The hand gesture types include swiping left, swiping right, swiping down, swiping up, pushing hand away, pushing hand in, turning hand clockwise, turn hand counterclockwise, thumb up, thumb down, shaking hand, drumming fingers, stop sign and so on.

Technique: Python, PyTorch, OpenCV, PIL, CUDA, 3D Convolutional Neural Network, Flask, HTML/CSS, JavaScript/jQuery

Training dataset: 20BN-jester Dataset V1

Project demo video: https://youtu.be/gBE7cOssUbI, https://youtu.be/bSkLH-Ng0D8

- **TimeMe—Time management tool**　　　　　　　　　　　Sept. 2019 – May 2020

Project description: A web application is developed to aid users with difficulty to manage their time.

Language: PHP, MySQL, JS

Software Framework: Laravel, vue.js

- **Photovoltaic power generation prediction based on LSTM**　　　October 2018 – May 2019

Project description: Predicting the short-term or ultra-short-term photovoltaic power based on LSTM. This project has been applied into DAQUAN Research Institute.

Language: Python, HTML, JS

Software Framework: Flask

Algorithm: LSTM-RNN

Training dataset: the dataset of one-year history photovoltaic power and weather condition provided from DAQUAN Research Institute.

Work experience

- **Applied Scientist Intern**　　　　　　　　　　　　　　June 2025 – Sept. 2025

Company: Amazon Web Services, Arlington, VA

Project Description: This internship project addresses critical challenges faced by incident responders investigating potential security incidents. Specifically, it targets three key pain points: manual and repetitive search processes across multiple log sources, inefficient search strategies when confronting complex and novel security patterns, and the overwhelming challenge of analyzing large data volumes during time-sensitive investigations. This project will developing an agentic search system that can (1) automate repetitive search tasks across multiple log sources; (2) process natural language queries from security analysts; (3) provide consistent, evidence-based findings.

Skills: LLM, LLM agent, Bedrock API, Strands SDK, DuckDB, Python

- **Research & Teaching Assistant**　　　　　　　　　　　Sep. 2021 – now

Company: Temple University

- **Research & Teaching Assistant**　　　　　　　　　　　Sep. 2019 – Dec. 2020

Company: Monmouth University

Teaching experience

- **Recitation**: CIS 2166 - Math Concepts in Computing II
  Spring 2024, Computer & Information Science Department, Temple University
- CIS 3211 Automata, Computability & Languages
  Spring 2024, Computer & Information Science Department, Temple University
- **Recitation**: CIS 1966 - Honors Math Concepts in CS I
  Fall 2023, Computer & Information Science Department, Temple University
- **Lab Instructor**: CIS 1057 - Computer Programming in C
  Fall 2023, Computer & Information Science Department, Temple University
- **Guest Lecture**: Software-defined Network with Ravel
  Feb 27th, Spring 2023, CIS4319 Computer Networks and Communications, Temple University

Algorithm competition experience

- Student Research Competition, Sigcomm 2021, August 23-27, 2021   Certificate of Recognition
- The 9th contest of LAN QIAO CUP, the Second Prize   Certification No.050902401

Honors

- National scholarship   2016 Fall-2017 Spring
- National scholarship for Encouragement   2017 Fall-2018 Spring

Scholarships

- The First Prize Scholarship   2015 Fall-2016 Spring CIT
- The First Prize Scholarship   2016 Fall-2017 Spring CIT
- The Second Prize Scholarship   2017 Fall-2018 Spring CIT
- The Second Prize Scholarship   2018 Fall-2019 Spring CIT
- Scholarship and he graduate research assistantship   2019 Fall MU
- Scholarship   2020 Spring MU
- The graduate research assistantship   2020 Spring MU
- The graduate teacher assistantship   2020 Spring MU
